RAPID 5 (PDA Stocktake)

Total Retail Solution

The DDA PDA Handheld Stocktaking System provides comprehensive sales and business management functionality wirelessly, anytime & anywhere.

Based on the proven Windows Mobile platform, DDA PDA Handheld allows retail businesses to conduct stock take, stock adjustment, stock receive, price updates, purchase orders, shelf label printing offers and customer quotation at any time.

For the first time at an affordable cost, Retail businesses can create and submit purchase orders on the spot, minimising processing time. Stock control can also be carried out wirelessly and conveniently, where paperless stock take is done electronically at the warehouses and shelves.

Item prices can be changed instantly using DDA PDA as we understand the need to update product prices at any time.

DDA PDA is a powerful tool for inventory control tasks. Reliable wireless connectivity makes electronic stocktaking more efficient as employees no longer need to return to base to input data.

Stock received can be recorded at the dock when receiving stock, automatically adjusting the stock levels on the server. Stock takes can be partially completed and continued later if required. Data is only submitted when it is complete. DDA Handheld solution increases the overall productivity by minimising employees' work load and time waste, allowing a better staff utilisation and resource management.

The cost effective wireless handheld stock take system

- User friendly – reduce staff training
- Improves customer service
- Light weight handheld touch screen.
- Reduces data-entry
- Over 12 hour's continuous use without recharge.
- Flexible menu configuration.
- Integrates with Digital Data Assist POS terminals and back office software.
- Increases bottom-line profits

RAPID 5 (Retail Edition)

Digital Data Assist (DDA) Retail Edition is an All-in-one Point-Of-Sale (POS) Software package for retail businesses such as supermarkets, fruit markets, grocery shops, convenience stores and other retail stores.

Designed with a touchscreen compatible user interface, DDA Retail Edition provides full functionalities and easy integration for any new or existing retail businesses to increase business productivity and quality of customer service.

Advantages of DDA Retail

- Full automation of routine tasks.
- Reduction in operation cost by freeing up staff and resources.
- Increasing quality of customer service.
- Greater profit margins by increasing overall business efficiency.
- Flexibility in database maintenance.
- Powerful account/book keeping tools.
- Remote access to multiple database location via internet, anywhere around the world.

Unlike other foreign and Australianised POS products available on the market, Digital Data Assist Software is 100% locally developed which is fully compatible with the Australian business environment and tax requirements, hence all functions and features are tailored for every Australian business's needs.

DDA software is best known for its flexibility and reliability. It has been extensively tested on the market and is proven with its exception reliability. Additionally, free lifetime software updates are available to our clients, making sure all of our customers are always happy and operating at the optimal level.

DDA Retail Edition offers professional retail businesses a wide range of day-to-day income generating and business productivity tools, from Point of Sale (POS) to stock management, ensuring every process of your business can be run seamlessly and efficiently at its best.
